Dear Nuria Alvarez Crespo,

We are pleased to offer you a traineeship to work with Giovanni Miniutti, Matteo Guainazzi, Anna Lia Longinotti, Jiri Svoboda, Ignacio de la Calle and Nora Loiseau on the project 3.20 'Unifying black holes of different masses through accretion disk winds'.

The traineeships are unpaid, however we do provide funding for local and non-local residents. A local resident is defined as someone living 50km or less from the ESA establishment. You fall into the local resident category, and would therefore receive funding of 200 Euros per month.

Please consider the funding along with your consideration of the traineeship. A local status can not be changed to non-local midway through the traineeship. If you accept, we will begin arranging a start date with you.

Best regards,
Deborah
